

ADHD RATING SCALES INSTRUCTIONS

In order to obtain complete information on your child's functioning at home and at school, your pediatrician would like you, and your child's teacher(s) and your child (if they are able) to fill out the SNAP rating scale.

1. Go to: www.adhdratingscales.com
2. Select who you are – “Parent Report”, “Teacher Report” or “Youth Self Report”
3. Scroll down and select “Infinity Pediatrics” from the list of registered clinicians; not the name of your child or your child's pediatrician
4. Agree to the Privacy Policy
5. Select SNAP IV-90 if this the first time you are completing the questionnaire (or requested by the pediatrician), or SNAP IV-30 if this a repeat assessment.
6. Please take some time to fill out the Comments section. Your comments are very useful to the pediatrician. This is also a easy way for you and your child's teacher to communicate their observations to the pediatrician.
7. Fill out the questionnaire and submit online
8. You're done! If desired, print a copy for your records

Your pediatrician would like to have a questionnaire completed before **every** follow-up appointment, and with each medication change.

Also, note that it make take a 1-2 business days for the results to be uploaded to your child's chart.

We look forward to receiving your feedback on your child!

Sincerely,

Infinity Pediatrics
