## ADHD RATING SCALES INSTRUCTIONS

In order to obtain complete information on your child's functioning at home and at school, your pediatrician would like you, your child's teacher(s) and your child (if they are able) to fill out the SNAP rating scale.

1. Click Here: [Follow Up ADHD Rating Scales](https://ocean.cognisantmd.com/intake/IntakePortal.html?eReqRef=1fa9ccb6-6124-49e5-a708-f52f0a0bfd6f)

Copy and Paste direct link:

<https://ocean.cognisantmd.com/intake/IntakePortal.html?eReqRef=1fa9ccb6-6124-49e5-a708-f52f0a0bfd6f>

Compatible to tablets/phones/computers- the link is available on our website homepage as well. To access the link direct from our website:

[www.infinitypediatrics.ca](http://www.infinitypediatrics.ca) Under the patient tab in the top right corner, select ADHD rating scales.

This is a secure link that connects to the electronic medical record at Infinity Pediatrics. Patients are not required to create an account or log into a patient portal in order to securely submit information and files.

2. Please enter the demographic information. If we are not provided the legal last name, the scale may not link to the correct patient chart. If you have your child's provincial health care number available please enter this to electronically match your report to your child's chart. This is an optional field for teacher submissions and can be left blank (but your teacher will need to enter your child's birthday)
3. Fill out the questionnaire. The end of the report has a comments section, please take this time to provide any additional information. Press "finish" at the very bottom.
4. You're done!

Your pediatrician would like to have a questionnaire completed before **every** follow-up appointment, and with each medication change.

Also, note that it may take a 1-2 business days for the results to be uploaded to your child's chart. Please complete a couple of days before the scheduled appointment.

We look forward to receiving your feedback on your child!

Sincerely,

Infinity Pediatrics
